

Boston Whaler® Options

At Boston Whaler®, we are hard-nosed about quality.

We have to be.

Our ten-year transferable warranty is so strong few other companies can offer anything like it. And no other company can offer our 30-year history of backing it up.

With that kind of warranty behind our hulls, we insist that every option built for those hulls is extraordinarily strong, exceptionally safe, and uncompromisingly crafted.

Finding options that meet our high standards is no easy job. More than once, our search has resulted in manufacturers upgrading their products specifically for us. And more than once, it has resulted in our deciding to manufacture the options ourselves.

Inside this catalog you'll find hundreds of options and replacement parts that have met our standards. Each one has been vigorously tested aboard each model it is available on, and comes with complete installation instructions. Check the listing at the end of each model section to see if it is available on your boat.

You may order options through your local Boston Whaler dealer. You'll find him knowledgeable, and ready to make specific recommendations.

You'll also find him to be as hard-nosed about quality as we are. After all, that's how he got to be a Boston Whaler dealer.

But then you're probably hard-nosed about quality yourself. That's how you got to be a Boston Whaler owner.

Whaler 27 Options.

Whaler 27 options are designed to help you fish the big tournaments and cruise the far horizons. As Boston Whaler's ultimate offshore fishing machine, the Whaler 27 Center Console Cuddy has the fishing options you would expect. Prominent among them are the many variations of Super Consoles and Super Leaning Post Workstations. (The 35" Super Console is standard.) You can find a complete description of the console options under Super Consoles in the Outrage section. Check them out. The original Whaler 27, which we like to think of as having muscle for the fight, and comfort for the night, nicely balances its options between the two. In the Full Cabin version of the Whaler 27, the balance swings toward cruising comfort, with such below-deck amenities as stove, refrigerator, and even a hot water system.

COCKPIT/CABIN/HULL

Whaler 27.

Cockpit Coaming Pads not only add an attractive touch of cockpit trim, but are cushioned so that they are soft and easy on fishermen's knees.

A Swim Platform is not only convenient for swimmers, but also a safety feature that makes getting aboard from the water easy. Built of rugged fiberglass and attractive teak. Inboard models only.

Maneuvering around a dock or edging up to a mooring at night becomes easier with **Flush-Mount Forward Docking Lights**. Flush mounting helps protect them from damage.

On inboard models, **Engine Box Pads** will make the engine box a great place to lounge in the sun or watch your lines when you're trolling. They also help insulate engine sound.

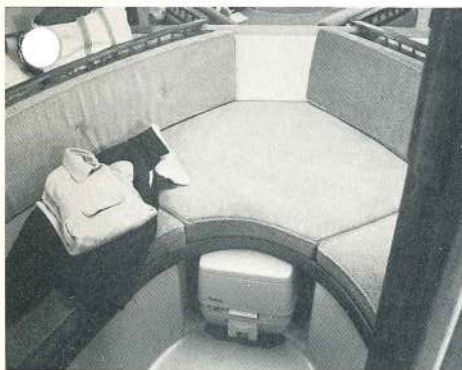

Keep things cold longer with an **Electric Refrigerator**. Available on Full Cabin models that also have the Shore Power option. Replaces icebox.

For real onboard comfort there's nothing like a warm shower or hot water for the dishes. The Whaler 27 **Six-gallon Hot Water System** includes a hand-held shower within enclosed head. Available on Full Cabin models that also have the Shore Power/Battery Charger option. Factory installed only.

Hot coffee in the morning and "eat-in" meals are made possible with our **Two-Burner Alcohol Stove**. Alcohol fuel is safe, and frees you from the need for a dockside electrical hookup. Available on Full Cabin.

Cockpit Courtesy Lights help with entertaining, line handling, and after-dark cleanup. Standard on Whaler 27 and Full Cabin.

The **Porta-Potti®** provides necessary comfort without the expense of a built-in marine head. Meets government discharge regulations. Available only on Center Console Cuddy.

A **Cushioned Cooler Seat** adds versatility to the seating aboard your 27-foot Boston Whaler. A special lock-down system keeps it securely in place. Featuring the heavy-duty Igloo® cooler, it is available in 86-quart and 162-quart sizes. It can also be used to increase dry-storage capacity.

Bound Rug Set adds to the good looks of the Whaler 27 Full Cabin by covering the cabin sole. Velcro backing makes it removable for easy cleaning.

The **Filler Cushion Set** increases v-berth area for more sleeping comfort. The textured fabric breathes, and resists moisture.

Show your pride in your Boston Whaler with 14", red **Whaler Lettering**, port and starboard.

MECHANICAL GROUP

Freshwater Cooling is especially valuable if you normally run your boat in salt water. A self-contained cooling system, just like you use on your car, adds to the life of your engine. Factory installed on inboard models only.

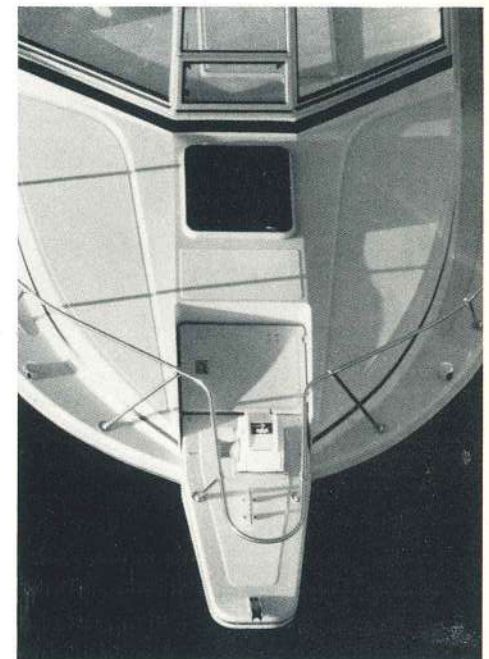

Hydraulic Trim Tabs, standard on inboard and Whaler Drive models, are highly recommended for Sea Drives with extra fuel capacity. Allows you to trim boat efficiently under varying sea and load conditions.

A **Shore Power Package**, with battery charger and converter, is highly recommended if you spend time at docks providing electrical outlets or do overnighting where power for lights, water heater and other electrical appliances is necessary.

The Whaler 27 **Automatic Halon Fire Extinguisher System** mounts inside engine compartment, where it can automatically direct fire-smothering gas directly to engine. Available on inboard models only.

An **Anchor Windlass** is handy to have when you want to anchor frequently within a short period of time, such as when bottom fishing.

Whaler 27 Center Console Cuddy.

Super Consoles and Super Leaning Post/Workstations make the Whaler 27 Center Console Cuddy an awesome fishing machine. Both have an amazing variety of optional combinations. For a complete description, see the Outrage Options.

More gallons in the tank means more hours on the water without refueling. **Extra Fuel Capacity** increases capacity of inboard models by 43 gallons and Sea Drive, Whaler Drive and outboard models by 140 gallons. Factory installed only.

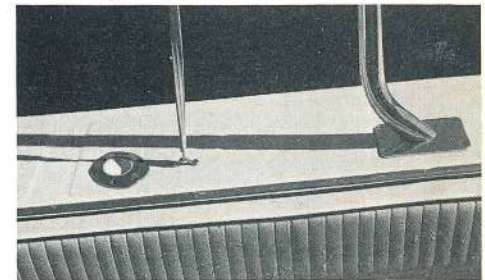

Pump for Aft Baitwells provides circulation of baitwell water when your Whaler 27 is at rest or underway, keeping bait fresh and active. Available on Whaler 27, 27 Full Cabin, and 27 Center Console Sea Drive.

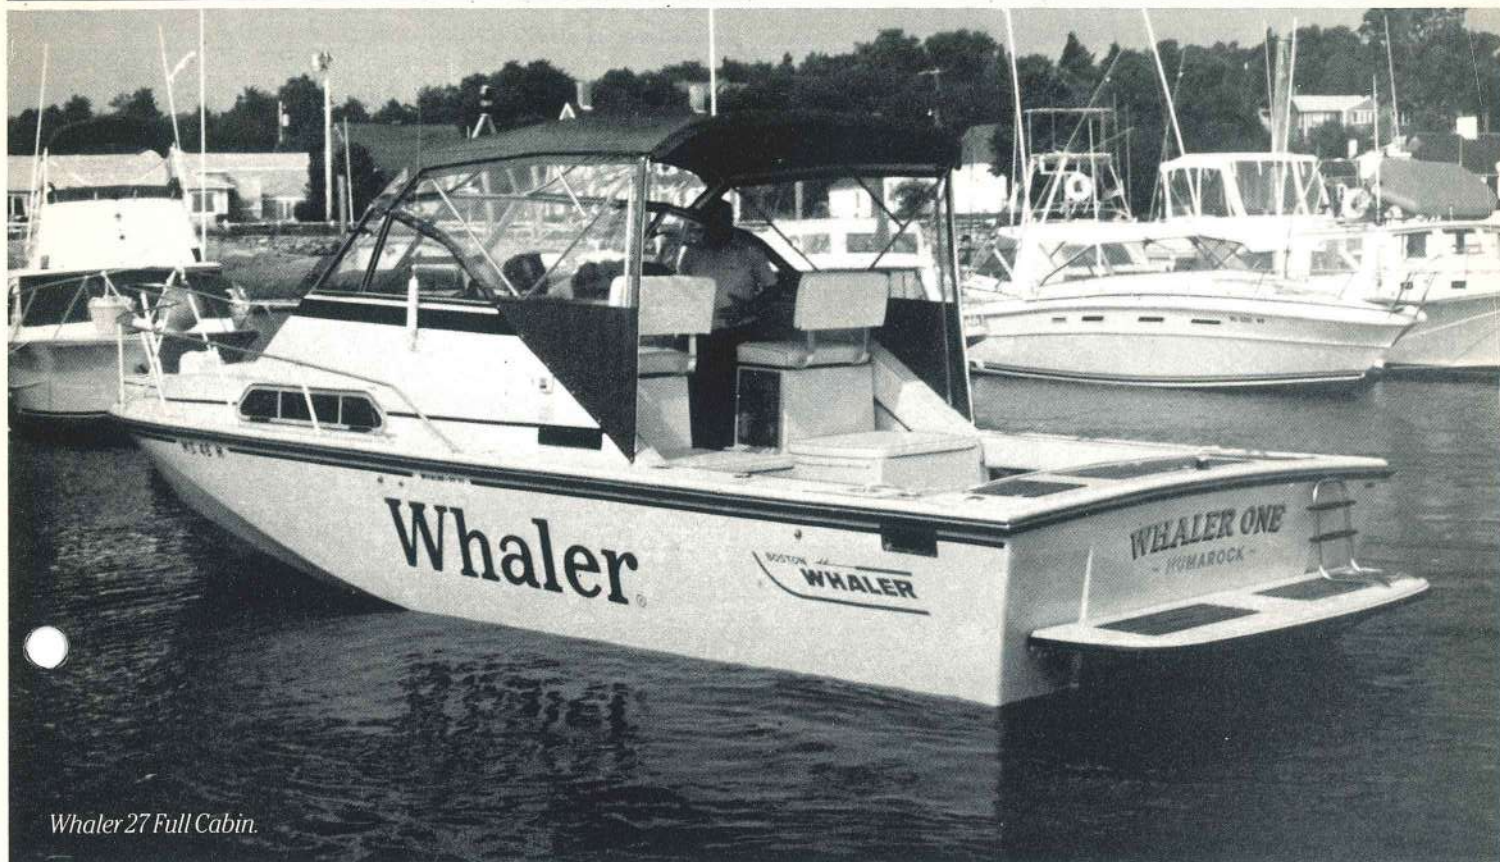

A Raw Water Washdown system gives you pressurized water underway and when there is no dockside faucet handy. System consists of a through-hull fitting with sea cock, pump, faucet, and switch. Factory installed only.

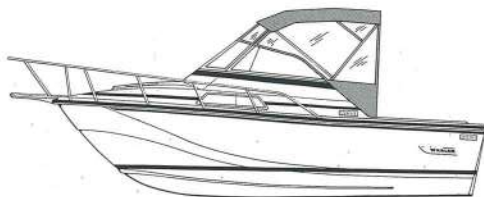

Flush Mount Rod Holders add even more rod-holding capacity to the flush mount rod holders already standard on all Whaler 27 models. Sold by the pair.

Gun'l Mount Outriggers fit in a stainless socket. The aluminum pole breaks down for easy storage. Since most fishermen have their own favorite tackle, we don't include rigging hardware.

Whaler 27 Full Cabin.

Flying Top Set keeps sun and rain off helm and passenger seats. Add a **Weather Curtain Set** to it and you can move around in the cockpit while remaining snug and dry. If you're a Center Console Cuddy owner, we also offer covers for your Super Console and Super Leaning Post.

WHALER 27 OPTIONS

Super Consoles for Whaler 27 Center Console Cuddy

- 35" Super Console (standard)
 - Top Mounted Electronics Box
 - Four Tackle Drawers
 - With forward storage unit
 - 85-Quart Cooler optional
- 40" Super Console
 - Top Mounted Electronics Box
 - Four Tackle Drawers
 - Tee-Top
 - With forward storage unit
 - 98-Quart Cooler optional

Super Leaning Post/Workstations for Whaler 27 Center Console Cuddy

- Super Leaning Post/Workstation with sink and cooler and either:
 - Four Tackle Drawers
 - Teak Aft Access Door
- Super Leaning Post/Workstation with livewell
 - Waterfill system (available only with raw water washdown)

- Bound Rug Set (only on Full Cabin)
- Refrigerator (only on Full Cabin)
- Six-gallon Hot Water System (only on Full Cabin)
- Two-Burner Built-in Alcohol Stove (only on Full Cabin)
- Cockpit Courtesy Lights (only on Center Console Cuddy)
- Horn (only on Center Console Cuddy)
- Hideaway Porta-Potti (only on Center Console Cuddy)
- Cushioned Cooler Seat—86 qt.
- Cushioned Cooler Seat—162 qt.
- 14" Whaler Lettering

Mechanical

- Freshwater Cooling, inboard only (n/a on Center Console Cuddy)
- Hydraulic Trim Tabs
- Compass—Ritchie Navigator Flush Mount (Surface Mount on Center Console Cuddy)
- Shore Power Package—battery charger and converter
- Automatic Halon Fire Extinguisher System, inboard only (n/a on Center Console Cuddy)
- Shipping/Storage Cradle
- Anchor Windlass

Fishing

- Pump for Aft Baitwells (n/a on 27 Center Console Cuddy outboard)
- Raw Water Washdown
- Extra Flush Mount Rod Holders
- Gun'l Mount Outriggers
- Deck Reinforcement for Fighting Chair

- Extra Fuel Capacity (140 extra gallons on all Sea Drive, Whaler Drive and Outboard models, 43 gallons on inboards)

Canvas

- Flying Top Set includes:
 - Flying Top with Boot
 - Windshield with Boot (n/a on Full Cabin)
- Weather Curtain Set includes:
 - Port Curtain
 - Starboard Curtain
 - Drop Curtain
 - Boot (n/a on Whaler 27)
- Super Console Covers (only on Center Console Cuddy)
 - 35" Console
 - 35" Console w/Electronics Box
 - 35" Console Forward Unit Cover
 - 40" Console
 - 40" Console w/Electronics Box
 - 40" Console Forward Unit Cover
- Super Leaning Post Cover (only on Center Console Cuddy)

Outboard Steering & Controls (n/a on Full Cabin)

- Single Cable Mechanical Steering (for outboards equipped with power steering)
- Morse Single Lever Dual Engine Controls (OMC or Merc)
- Teleflex Dual Lever Dual Engine Controls (OMC or Merc)

For a complete description of options not shown, turn to pages 25-26.

Outrage Options.

Whether you use your Outrage® for trolling the blue water or day-cruising with your family, we've got the options you want. At the heart of what makes an Outrage such an awesome fishing machine are the Super Consoles and Super Leaning Post/Workstations, both with an amazing variety of optional combinations. Outrage canvas options increase weekending capabilities and allow you to button up against the weather. They range from Flying Top and Weather Curtain sets to Shelters and Mooring Covers. There are lots of other options too. Every one selected by us with the same uncompromising concern for Boston Whaler quality that goes into every Outrage we build.

Outrage 25.

SUPER CONSOLES

Our 35" **Super Console** is available on all Outrage models except the 18, and is standard on the Whaler 27 Center Console Cuddy. It includes an 18" stainless steel steering wheel, recessed fire extinguisher, lockable teak access door and side storage bins with teak access doors. The 20- and 22-foot models feature twin cable steering. The 25-foot models are fitted with hydraulic steering.

The 35" Super Console is also available with a **Top Mounted Electronics Box** and **Four Tackle Drawers**. The Electronics Box has a lockable, plexiglass cover, and mounts at just the right height for easy viewing from the helm position without interfering with vision forward. A plexiglass windshield and console side grab rails replace the aluminum frame windshield and console rail. The Tackle Drawers feature teak access doors.

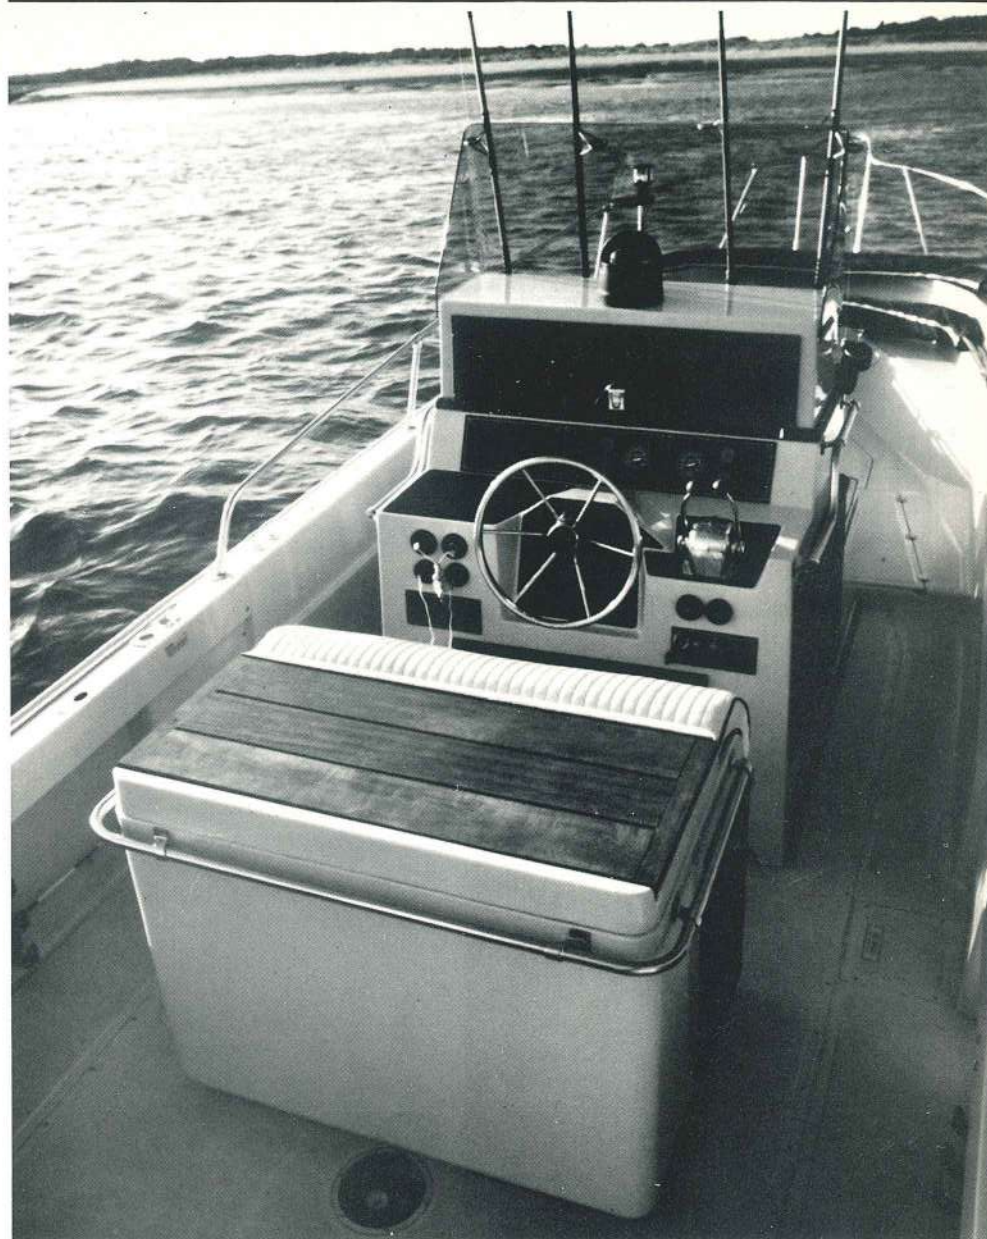

SUPER LEANING POST/WORKSTATIONS

On the Outrage 22 and 25 and the Whaler 27CC, the 35" console is available with a **Forward Storage Unit/Cushioned Seat**, which can be equipped with an optional 85-quart Cooler.

A **40" Super Console** is available on 25-foot models and on the Whaler 27 Center Console Cuddy. It includes the same standard equipment as the 35" Super Console. The **Top Mounted Electronics Box** and **Four Tackle Drawers** have the same features listed under the 35" Super Console. The **Forward Storage Unit**, not available on the 25 Cuddy, features an optional 98-quart **Cooler**. A **Tee-Top** with enclosed communications center protects you and your electronics from the elements.

Offering as wide a combination of options and variations as the Super Console is the **Super Leaning Post/Workstation**. Each basic unit is 40 inches wide, with a padded leaning post and an integrated workstation unit aft. Extra storage is accessible via port and starboard teak access doors.

The **Super Leaning Post/Workstation with Sink and Cooler** adds a sink with a freshwater system and a 40-quart cooler with a teak workstation top. Options include either **Four Tackle Drawers** with teak access door, or **Teak Aft Access Door**.

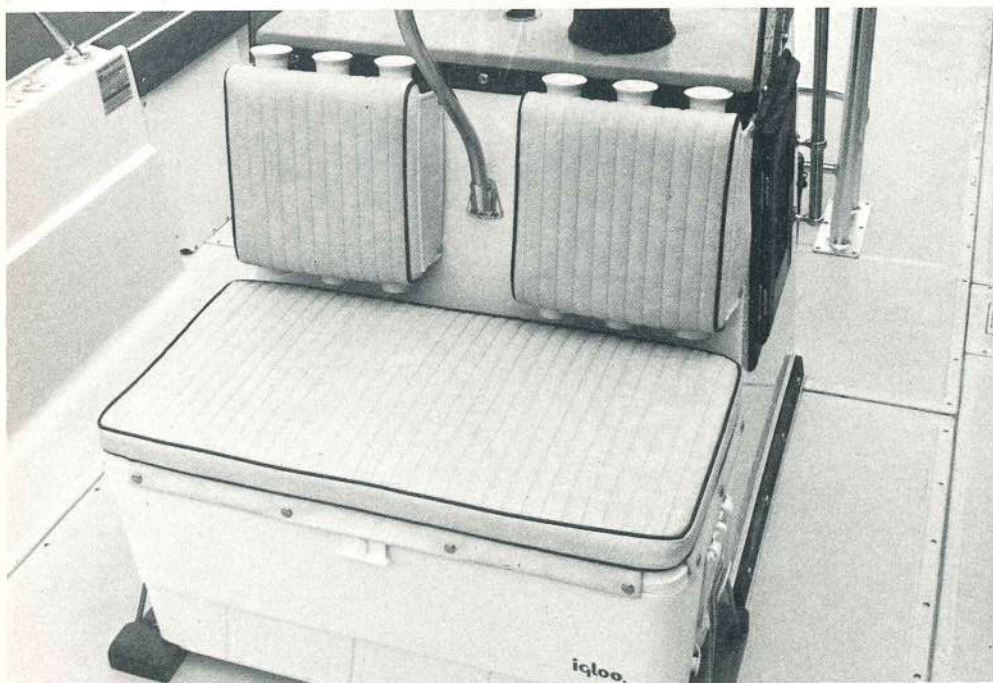

The **Super Leaning Post/Workstation with Livewell** adds a 28-gallon livewell and aerator, plus a teak workstation top. Optional **Waterfill System** available only with the Raw Water Washdown. The aerator can be deleted for credit if the waterfill option is purchased.

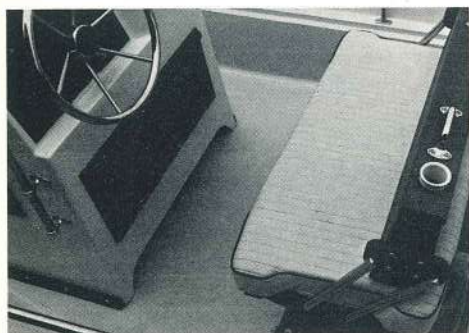

SEATING

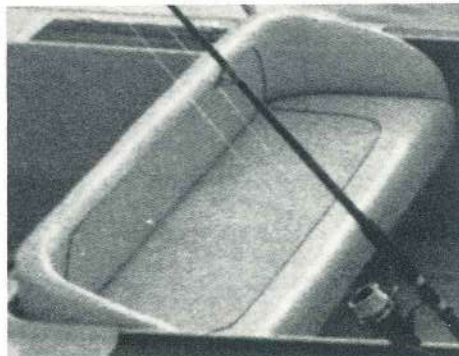

Sturdy and functional, the **Padded Aluminum Leaning Post** comes with aft rocket launchers and an 86-quart cooler holder. Standard on 25-foot models.

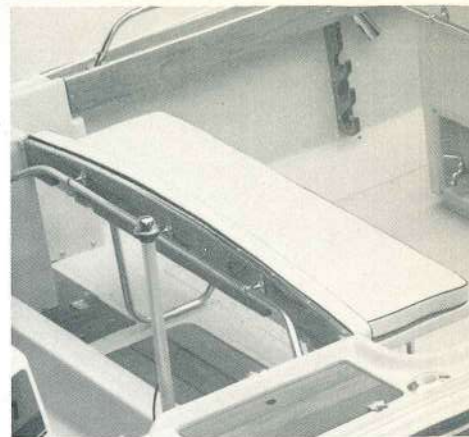

A **Cushioned Cooler Seat** is the most versatile seating you can put in your Outrage. A special lock-down system keeps it securely in place. Featuring the heavy-duty Igloo cooler, it is available in 86-quart and 162-quart sizes. It can also be used to increase dry-storage capacity.

The **Reversible Pilot Seat**, not available on the 25, has a teak backrest that faces forward for running and aft for fishing. The seat is upholstered. The backrest has grab handles, storage compartment, and two rod holders.

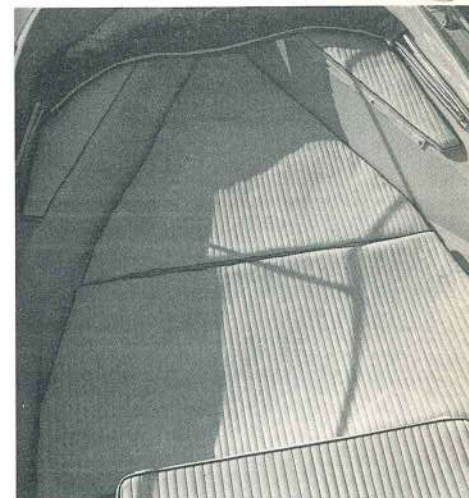

The backrest of the **Full Width Stern Seat** with rail is kept comfortably low so fishermen can kneel on the seat and work over the stern. The rail adds additional strength and stiffness.

A **Fold-down Stern Seat** provides extra seating comfort that can be folded away to add to the size of the already spacious cockpit. Not available on Outrage 18.

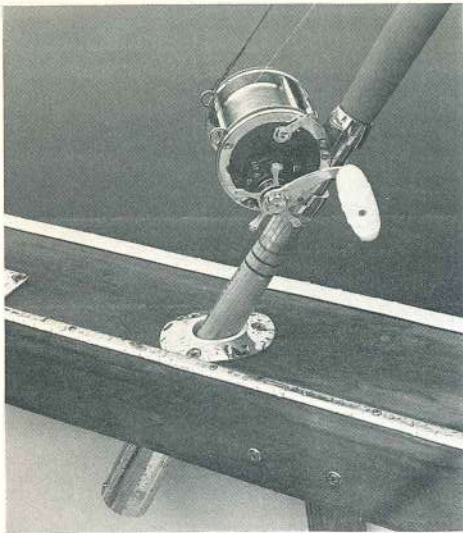

Molded **Fiberglass Swivel Seats**, available as an option on the 25 Cuddy, (standard on Outrage 18, 20, 22 and 22 Cuddy) feature snap-on upholstery that makes them comfortable for running. Or they can be swiveled for fish-fighting efficiency. They come with arm rests, rod holder, and gimbal, and can be slid fore and aft. The swivel locks in place.

The **Bow Platform Cushion Set** is covered with durable Boston Whaler upholstery for good looks and long life.

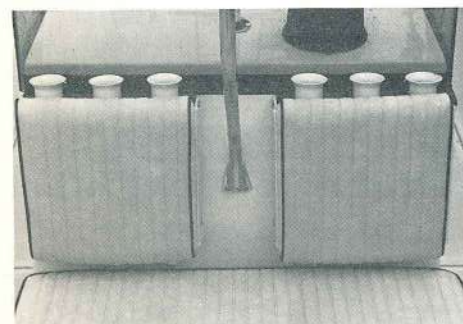

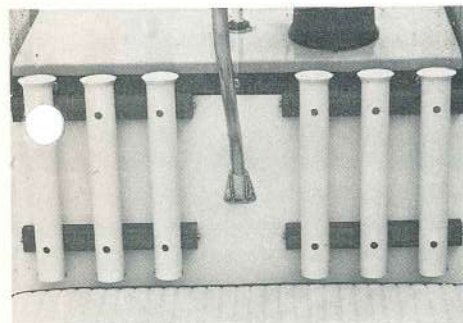

Stern Drive Quarter Seats increase the seating capacity of all Outrage I/O's. Sold as a pair.

Sold by the pair, **Flush Mount Rod Holders** are permanently mounted in the gun'l, where they are out of the way when not in use.

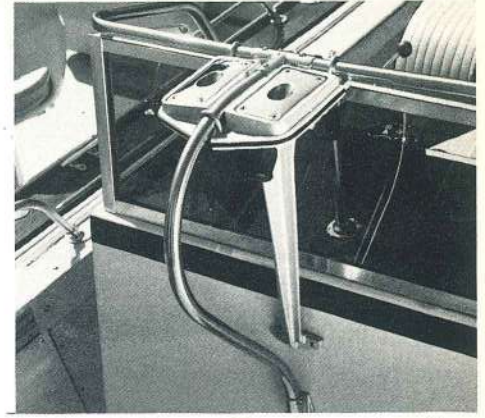

Rail Mount Rod Holders are versatile, without requiring permanent fasteners. The universal mount allows you to vary rod angles.

Console Mounted Rod Holders provide rod storage forward. With a cooler seat forward of the console, **Rod Holder Cushions** provide a comfortable seat back. For six rods order two sets.

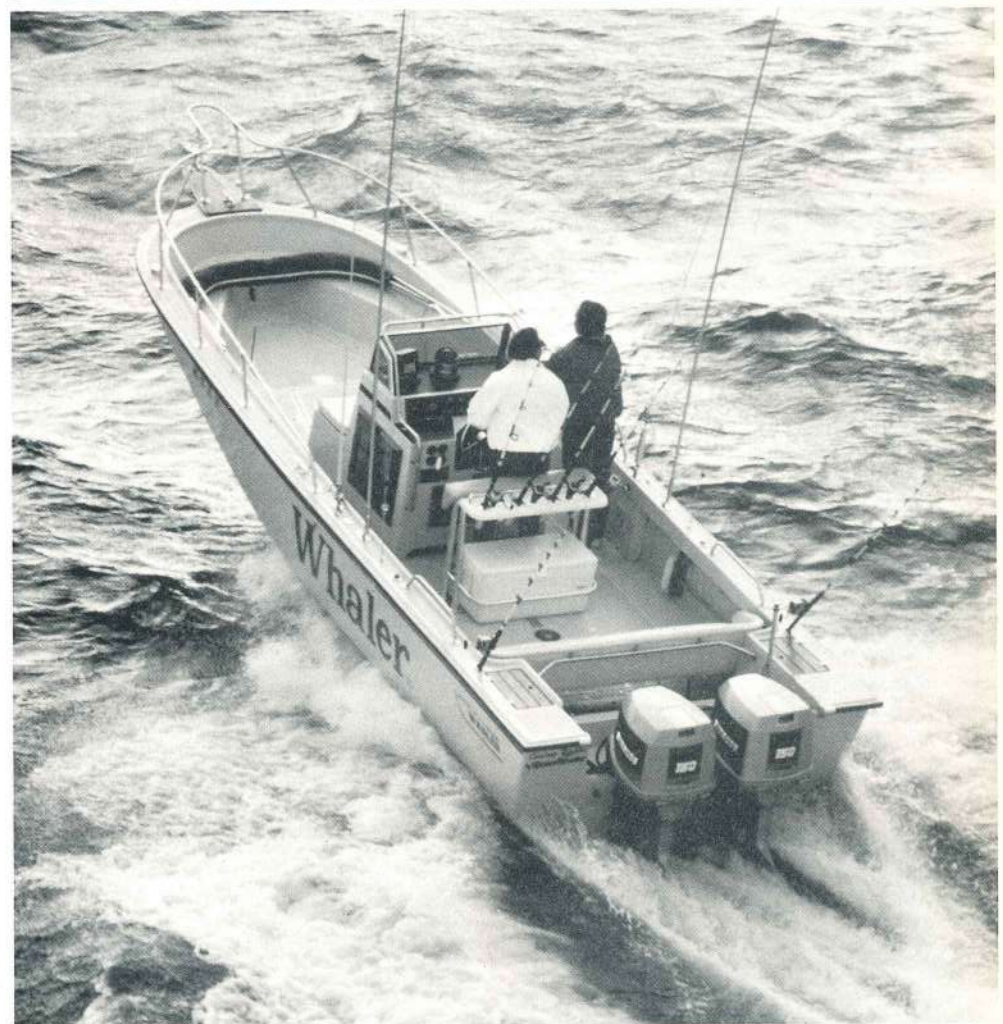

Gun'l Mounted Outriggers feature a stainless steel socket and aluminum pole that breaks down for easy storage. Since most fishermen have their own favorite tackle, we don't include rigging hardware.

For **Console Mounted Outriggers**, the stainless base permanently attaches to the console rail.

Tee-Top Outriggers are available for 25-foot models.

COCKPIT/CABIN/HULL

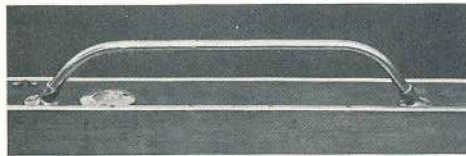

Fiberglass Gun'l Boards are a factory-installed option that adds to the Outrage's well-deserved reputation for low maintenance.

The **Teak Bow Pulpit with Rail** is another factory-installed option that lets you stow a muddy anchor without bringing it into the cockpit.

Side Rails provide maximum hand holds along the gun'l.

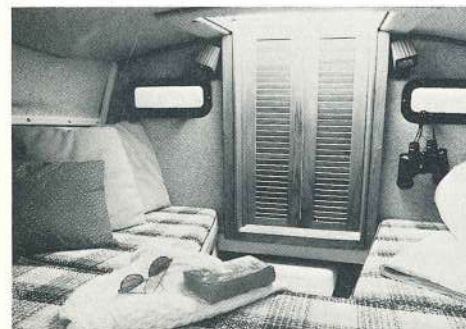

Side Deck Grab Rails are also for use along the gun'l, but don't consume as much space as the side rails. Can't be installed together.

Show off your pride in your Boston Whaler with port and starboard red **Whaler Lettering**. 10½ inches high for 18, 14 inches for other models.

The **Bunk Cushion Set**, available on the 22 and 25 Cuddy, is made of manageably-sized sections, allowing easy access to storage. The textured fabric breathes, and resists moisture.

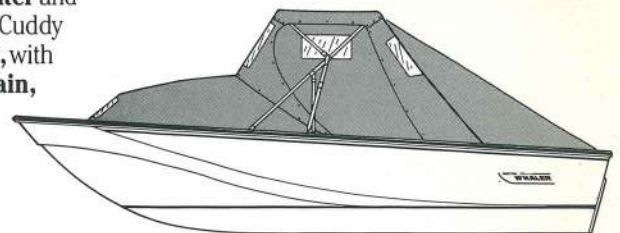

The **Hideaway Porta-Potti** provides necessary comfort and hides away beneath the cockpit sole. Meets government discharge regulations. Available only on Cuddys.

CANVAS

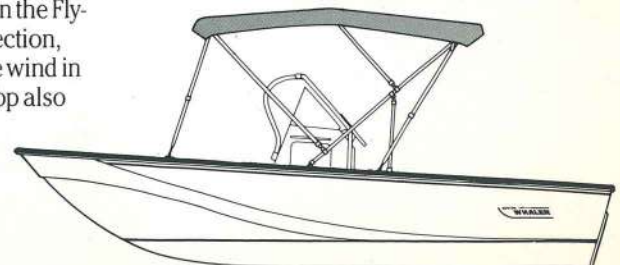

Outrage 25.

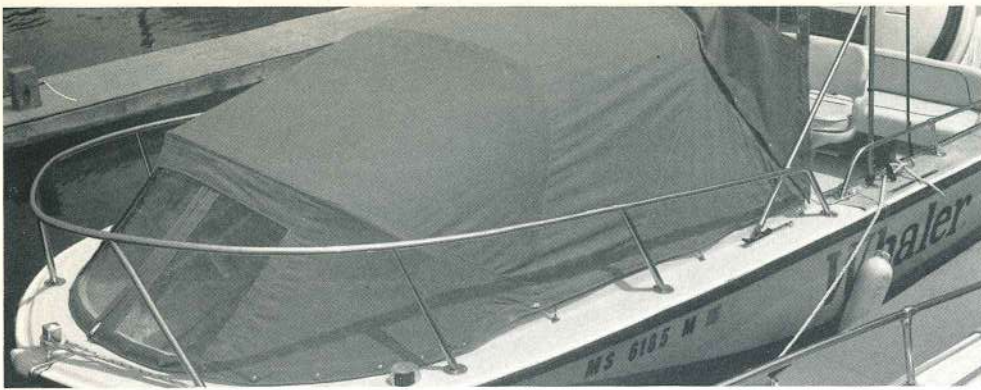

A **Flying Top Set**, with **Forward Shelter** and **Windshield** (shelter not required on Cuddy models), and a **Weather Curtain Set**, with **Side Curtains** and **Drop or Aft Curtain**, increases weather protection and privacy for overnighting. Shown is an Outrage 25 with Flying Top Set.

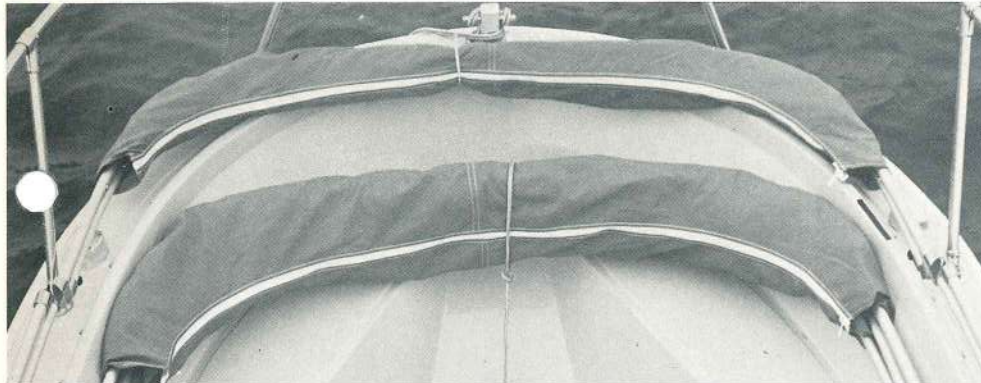

Outrage 22 Cuddy.

The **Sun Top**, considerably larger than the Flying Top, provides maximum sun protection, while still allowing you to run with the wind in your face. On Cuddy models, Flying Top also serves as Sun Top.

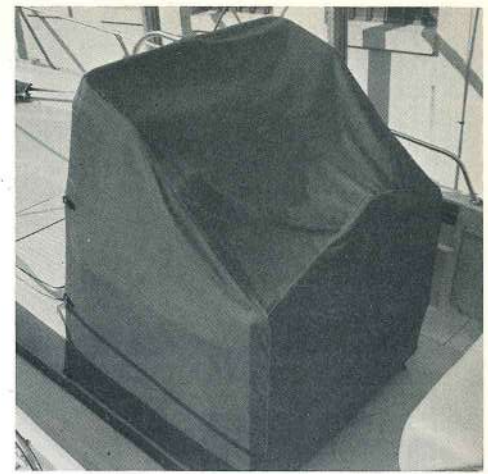

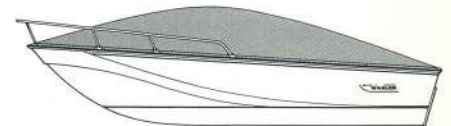

The Outrage **Forward Shelter** gives you a place to get out of the weather. It also provides privacy for a Porta-Potti or overnighting. When you're running, the Shelter does not interfere with the view from the helm. When not in use it folds away easily. Shown is an Outrage 18

When the Flying Top, Windshield, and Shelter are not in use, they can be zipped into their **Protective Boots**. Shown is Flying Top and Shelter Boot for Outrage 25.

Outrage **Console Covers** are available for whatever combination of console options you choose. **Seat Covers** are also available for all Outrage seat options, including Reversible Pilot Seat, Stern Seat, and Swivel Seat.

Our blue acrylic **Mooring/Trailing Cover** protects your Outrage from the elements, but breathes to let the air circulate. Specify with or without Top Mounted Electronics Box.

OUTRAGE OPTIONS

Super Consoles

- 35" Super Console (n/a on 18)
 - Top Mounted Electronics Box
 - Four Tackle Drawers
- With Forward Storage Unit (only on Outrage 22 and 25)
 - 85 Quart Cooler optional
- 40" Super Console (only on 25-foot models)
 - Top Mounted Electronics Box
 - Four Tackle Drawers
 - Tee-Top
- With Forward Storage Unit (only on Outrage 22 and 25)
 - 98 Quart Cooler optional

Super Leaning Post/Workstation (n/a on 18)

- Super Leaning Post/Workstation with sink and cooler and either:
 - Four Tackle Drawers
 - Teak Aft Access Door
- Super Leaning Post/Workstation with livewell
 - Waterfill System (available only with raw water washdown)

Seating

- Padded Aluminum Leaning Post with rocket Inchr. & cooler hldr. (standard on 25 & 25C)
- Cushioned Cooler Seat, 86 qt., fwd. of console
- Cooler, 86 qt. (fits under std. leaning posts)
- Cushioned Cooler Seat, 162 qt. fwd. of Super Console (only on Outrage 22 & 25)
- Reversible Pilot Seat (n/a on 25-foot models)
- Full Width Stern Seat with rail
- Fold-down Stern Seat (n/a on 18)
- Swivel Seat (standard on 18 to 22-foot models)
- Bow Cushion Set (n/a on Cuddys)

Fishing

- Flush Mount Rod Holder
- Rail Mount Rod Holder
- Console Rod Holder

- Cushion for Console Rod Holder
- Console Rail-Mount Outtrigger (n/a on Cuddy models)
- Gun'l Mount Outtrigger
- Tee Top Outtrigger
- Lockable Rod Storage Box, port or starboard (only on Outrage 25 with Standard Console)

Cockpit/Cabin/Hull

- Fiberglass Gun'l Boards (factory installed only)
- Teak Bow Pulpit with Rail
- Compass - Ritchie Nav. Surface Mount
- Compass - Ritchie Nav. Super Console (n/a on 18)
- Bilge Pump (standard on 22C & 25C)
- Pair Stainless Side Grab Rails (can't be installed with Side Rails)
- Stainless Side Rails (can't be installed with Side Grab Rails, n/a on 22C)
- Stainless Stern Rail (only on 20 & 22-foot models without Stern Seat)
- Commercial Duty Rub Rail Kit (factory installed)
- Workboat Specs (recommended for Commercial Service)
- Springline Cleats
- Whaler Lettering (10 1/2" for 18, 14" for other models)
- Extra Fuel Capacity - 119 gallon tank, factory installed only (22 & 22C only)
- Bow Lifting Eye Set (Cuddys only)
- Bunk Cushion Set (Cuddys only)
- Extra Battery Box
- Hideaway Porta-Potti (Cuddys only)

Canvas

- Sun Top with Boot (n/a on Cuddys)
- Flying Top Set includes:
 - Flying Top w/Boot
 - Forward Shelter w/Boot (n/a on Cuddys)
 - Windshield w/Boot
- Shelter Aft Curtain (n/a on Cuddys)
- Weather Curtain Set includes:
 - Starboard Side Curtain
 - Port Side Curtain

- Drop Curtain (only on Cuddys and Outrage 25)
 - Top Aft Curtain (only on Outrage 18-22)
- Top Aft Curtain (only on 22 Sea Drive Blank, 25 Outboard)
- Custom Mooring/Trailing Cover (n/a on Cuddys)
- Mooring Cover Support Kit (only needed on Outrage 20 & 22 with std. consoles)
- Super Leaning Post Cover
- Console Covers:
 - Standard Console Cover
 - 35" Console Cover
 - 35" Console Cover w/Electronics Box
 - 35" Forward Unit Cover
 - 40" Cover
 - 40" Cover for Console w/Electronics Box
 - 40" Forward Unit Cover
- Reversible Pilot Seat Cover
- Stern Seat Cover
- Swivel Seat Cover

Steering and Controls

- Single Cable Mechanical Steering (n/a on 18)
- Single Cable Steering dual Merc (only on 18)
- Hydraulic Steering (standard on 25 & 25C)
- Dual Engine Tie Bar (hydraulic steering)
- Dual Engine Tie Bar - Twin Cable (n/a on 25 & 25C)
- Morse Single Engine Control (OMC or Merc)
- Morse Dual Engine Controls (OMC or Merc)
- Instrument Panel (for dual engines order two)
- Morse Engine Control tilt & trim (OMC or Merc)
- Trim Gauge (OMC or Merc)

Power, in addition to outboards (n/a on 20)

- Sea Drive Blank

For a complete description of options not shown, turn to pages 25-26.

Revenge Options. The Revenge® can be rigged for fishing, or family cruising, or a combination of both. With its long list of options, the choice is up to you. Newest of the Revenge fishing options is a Super Pilot Seat/Workstation. One of its several optional combinations of tackle drawers, sink, live well, or fish well/storage is probably just what you are looking for. There are many other options too. Every one selected by us with the same uncompromising concern for Boston Whaler quality that goes into every Revenge we build.

Revenge 25 Walk-Through.

The **Super Pilot Seat/Workstation** is a sturdily built fiberglass unit that greatly increases the fishability of all Revenges. Replacing the standard Swivel Seats, the Super Pilot Seat/Workstation can be located in the helm or passenger position. Or, you could even have a unit installed in both positions. Each unit features four different optional arrangements, listed below. The unit itself is the same ruggedly constructed molded fiberglass, and features durable upholstery for added comfort. **Workstation Cushions** are optional.

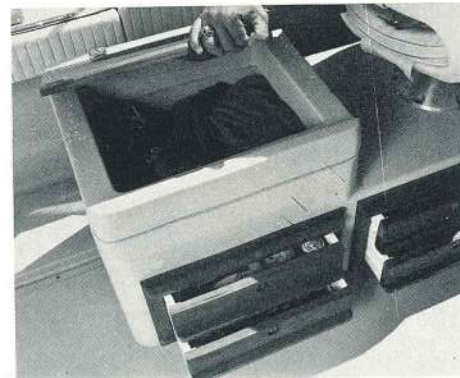

One option offers **Two Tackle Drawers** beneath the seat, and a **Sink Option** directly behind it. When not in use, the sink is covered by a teak top.

Another option includes the **Two Tackle Drawers** and a **Live Well**, also with a teak top.

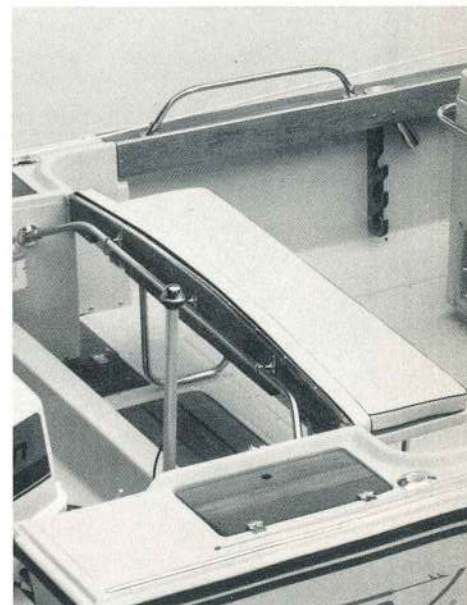

If you're more concerned with where you're going to keep the fish you catch than with where you're going to store the tackle you catch them with, you can opt for the arrangement that turns the entire unit into a **Fish Well**. Or you can use it for storage.

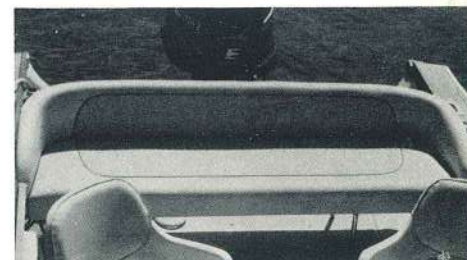

On the other hand, if you never seem to have enough tackle-drawer space, you'll be happy with yet another arrangement that doubles the number of **Tackle Drawers** and adds storage beneath the teak top.

A **Cushioned Cooler Seat** is probably the most versatile seating you can put in your Revenge. A special lock-down system keeps it securely in place. Featuring the heavy-duty Igloo cooler, it is available in 86-quart size. It can also be used to increase dry-storage capacity.

The **Fold-down Stern Seat** with side grab rails provides extra seating comfort that can be folded away to add to the size of the already spacious cockpit. Not available on 25 Walk-Around or Whaler Drive.

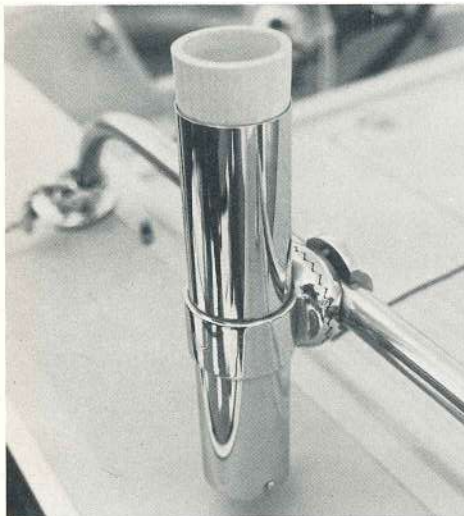

The backrest of the **Full Width Stern Seat** with side grab rails is kept comfortably low so fishermen can kneel on the seat and work over the stern.

FISHING

Sold by the pair, **Flush Mount Rod Holders** are permanently mounted in the gun'l, where they are out of the way when not in use. Not available on the Revenge 20.

Rail Mount Rod holders are versatile, without requiring permanent fasteners. The universal mount allows you to vary rod angles.

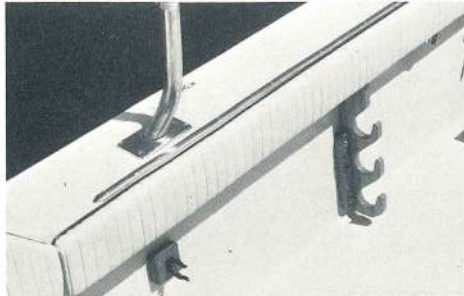

Gun'l Mounted Outriggers feature a stainless steel socket and aluminum pole that breaks down for easy storage. Since most fishermen have their own favorite tackle, we don't include rigging hardware.

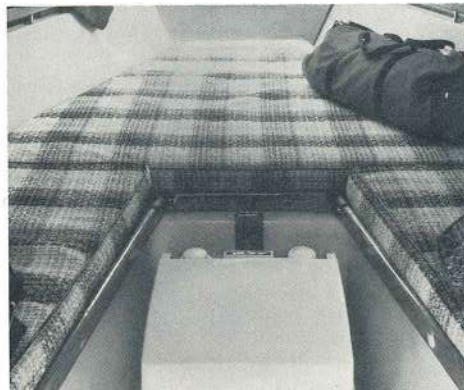

COCKPIT/CABIN/HULL

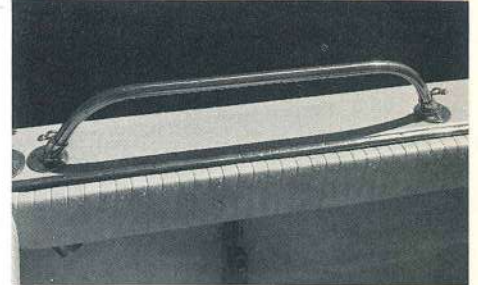

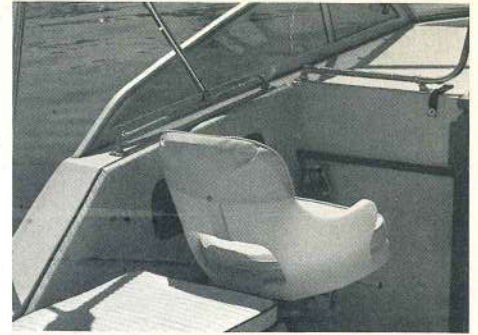

The **Fiberglass Bow Pulpit**, complete with stainless bow rail extension, allows for secure fishing from the bow and efficient, safe handling of anchor and forward lines. Factory installed only. Not available on 25 Walk-Around.

Upholstered Gun'l Coaming Pads not only add an attractive touch of cockpit trim, but are soft and easy on fishermen's knees. Not available on 25 Walk-Around.

The **Porta-Potti** provides necessary comfort, and hides away beneath the **Bunk Extension/Cabin Table** when not in use. Meets government discharge regulations. The **Bunk Extension Cushion** is upholstered with a textured fabric that breathes, and resists moisture.

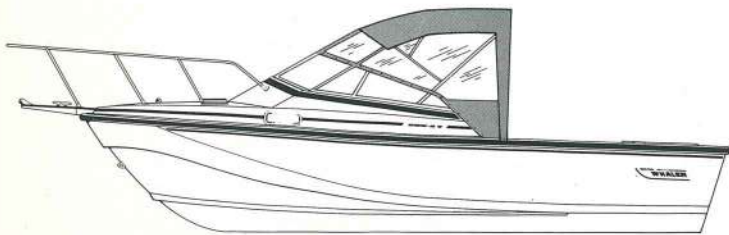

Stainless **Companion Grab Rails** and **Side Grab Rails** are located where 30 years of experience tells us you need them. Not available on the 25 Walk-Around.

With a **Raw Water Washdown** system you can get pressurized water even where there is no dockside faucet handy. System consists of a thru-hull fitting with seacock, pump, faucet, and switch. Factory installed only.

Show your pride in your Boston Whaler with 14", red **Whaler Lettering**, port and starboard.

The **Flying Top Set**, with **Flying Top** and **Windshield** (windshield not required on the 25 Walk-Around), protects you from the sun, wind, and rain. When not in use, it can be zipped into a protective Boot. The **Weather Curtain Set**, including **Side Curtains** and **Drop Curtain**, keeps things dry below, while still allowing you freedom to move about the cockpit. When you're running, the Drop Curtain easily folds away. On the 25 Walk-Around, the **Top Aft Curtain** increases cockpit protection even more.

For the times when you don't want to button up your Revenge completely but still give it some protection from the elements, we've got a **Stern Seat Cover**, and a **Swivel Seat Cover**.

REVENGE OPTIONS

Super Pilot Seat/Workstation

- Super Pilot Seat/Workstation
 - With Sink and 2 Tackle Drawers
 - With Livewell and 2 Tackle Drawers
 - With Fishwell/Storage
 - With 4 Tackle Drawers and Storage

- Instrument Panel, dual
- Trim Gauge (OMC or merc)

Power options, in addition to outboards (n/a on 20)

- Sea Drive Blank

For a complete description of options not shown, turn to pages 25-26.

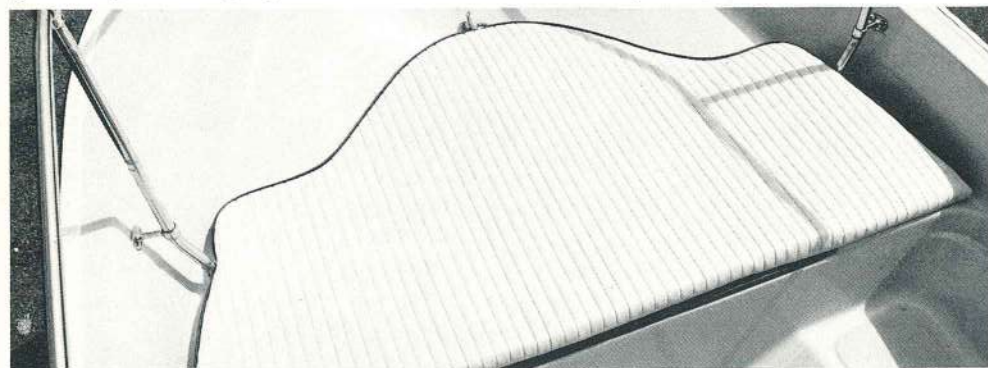

Montauk 17 Options.

You'd expect the boat that started the Center Console revolution to be strong on fishing options, and the Montauk certainly is. You can even get a Padded Leaning Post with rocket launchers and a holder for an 86-quart cooler. But we haven't overlooked the non-fisherman either. Among other things, we offer a Bow Cushion for when you feel like lazily lounging in the sun.

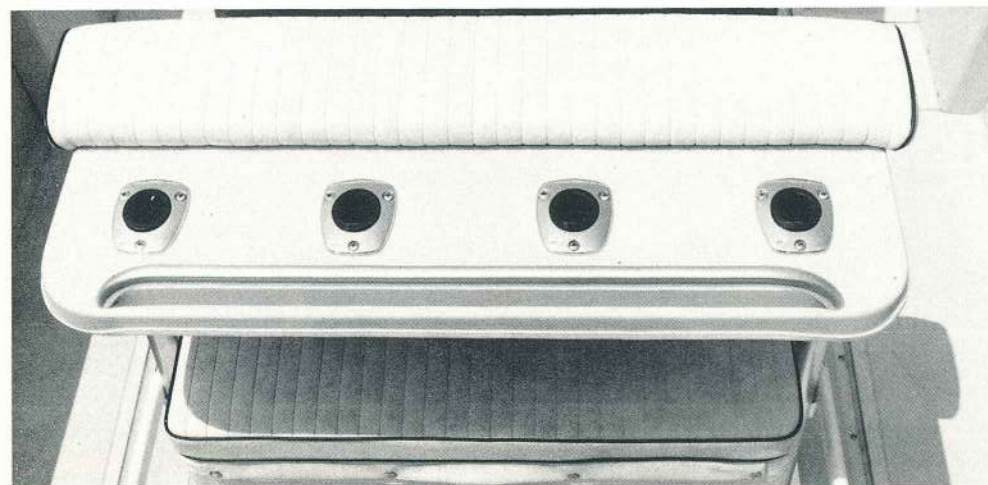

SEATING

Montauk's 86-quart **Cushioned Cooler Seat** is the ultimate in versatile seating. A special lock-down system keeps it securely in place. Can also be used to increase dry-storage capacity.

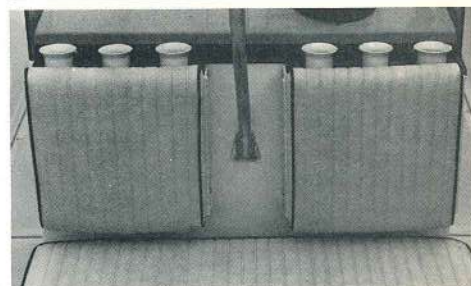

The **Bow Platform Cushion** is made of Boston Whaler upholstery for good looks and long life.

For the serious fisherman, the **Montauk Padded Aluminum Leaning Post** features aft rocket launchers and 86-quart aluminum cooler holder. Forward area is heavily padded for leaning comfort. Stainless steel frame.

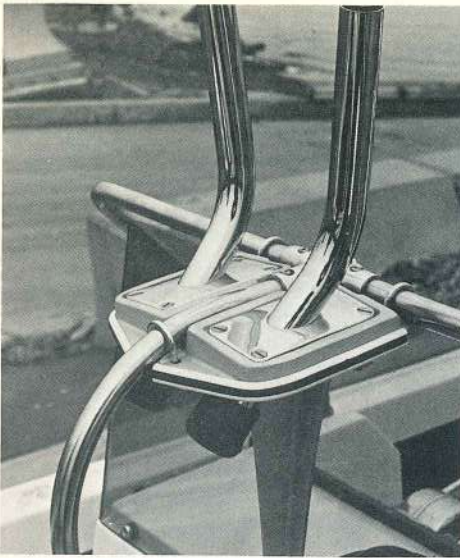

FISHING/SKIING

Console Rod Holders provide rod storage forward. Three holders per set. For six rods, order two sets. With a cooler seat forward of the console, **Console Mount Rod Holder Cushions** make a comfortable seat back. For six rods, order two sets.

Rail Mount Rod Holders are versatile, without requiring permanent fasteners. Universal mount allows you to vary rod angles. Stainless for beauty and long life.

Console Rail Mount Outriggers are another option for the serious fisherman. The stainless base permanently attaches to the console rail.

A fisherman's delight, the **Forward Pedestal Seat** has a back that lies down and snaps in place to increase operator visibility and protect upholstery from weather. Locking handle stops swivel action. Seat and pedestal can be removed from bulkhead-mounted pedestal base.

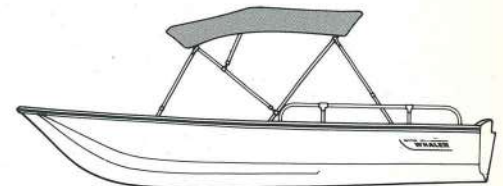

A 400 gallon per hour **Automatic Bilge Pump** includes a 3-position switch (off-automatic-manual) and an indicator light.

CANVAS

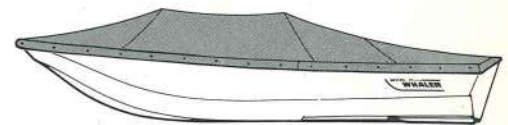

The **Flying Top Set**, with **Windshield** and **Forward Shelter**, and the **Weather Curtain Set**, with **Side** and **Drop Curtains**, form various combinations to protect you from the

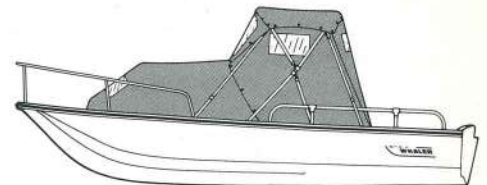

weather and turn your Montauk into a floating hideaway. When the Flying Top Set, Windshield, and Forward Shelter are not in use, they can be zipped into **Protective Boots**.

If you like to run with the wind in your face, but stay out of the sun, the Montauk **Sun Top** is considerably bigger than the Flying Top.

A **Custom Mooring/Trailing Cover** protects your Montauk from the elements when you're not aboard. Blue acrylic is mildew and rot resistant and won't shrink.

For the ultimate in protection, we've got **Console** and **Reversible Pilot Seat Covers**.

MONTAUK OPTIONS

Seating

- Bow Platform Cushion
- Padded Aluminum Leaning Post w/rocket launchers and 86 quart cooler holder
- Cushioned Cooler Seat, 86 qt. (fwd. of console)

Striper Options.

Although the Stripers are designed primarily for the fisherman who wants to divide his time between inland and coastal waters, they have the options that can make you feel equally at home waterskiing or simply enjoying an afternoon in the sun.

FISHING/SKIING

When a **Stern Deck Assembly**, with molded-in fishwell and overboard drains, is ordered for the Striper 17, either a **Ski Pylon** or **Aft Pedestal Seat** may be added. The assembly is solidly built and securely fastened.

Rail Mount Rod Holders are versatile, without requiring permanent fasteners. The universal mount allows you to vary rod angles.

The **Ski Pylon Assembly** is a Striper 17 option that gets the tow rope forward of the engine for better control. The Pylon is heavy-duty stainless steel, with a stainless base and support ring. A Stern Deck Assembly is required.

COCKPIT/HULL

The Striper **Bow Platform** and **Stern Deck Cushion** are covered with durable Boston Whaler upholstery for good looks and long life. A Bow Rail is required for the Bow Platform Cushion.

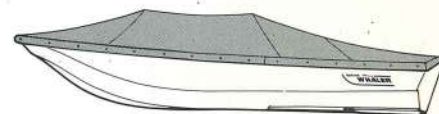

Show off your pride in your Boston Whaler with port and starboard 10½-inch-high red **Whaler Lettering**.

CANVAS

On the Striper 17, a **Sun Top** keeps you out of the sun, while still allowing ample room to move around in the boat. When not in use, the top can be zipped into its **Protective Boot**.

A **Custom Mooring/Trailing Cover** protects your Striper from the elements when you're not aboard. Blue acrylic resists mildew and rot, and doesn't shrink. When ordering, specify with or without Bow Rail.

STRIPER OPTIONS

Fishing/Skiing

- Stern Deck Assembly (17 only)
 - Ski Pylon Assembly (17 only)
 - Aft Pedestal Seat Assembly (17 only)
 - Ski Pylon only (req. aft pedestal seat assembly) (17 only)

Newport 17 Options.

Waterskiers, picnickers, and fishermen will find the options that will let them pursue their pleasures in the Newport style. As just one example of how flexible our options make the Newport, its Aft Pedestal Seat can be removed and a Ski Pylon slipped into place.

SEATING

The Newport's **Bow Platform Cushion** is covered with durable Boston Whaler upholstery for good looks and long life.

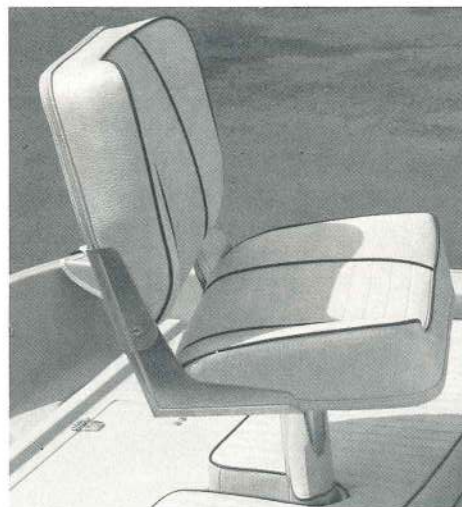

Cushioned Cooler Seats are available in 48- and 86-quart sizes. They provide the most versatile seating you can put in your Newport. Special lock-down system keeps them securely in place. Can also be used to increase dry-storage capacity.

Mounting in the helm position as a replacement for the Reversible Pilot Seat are **Swivel Seats**. Snap-on upholstery makes them comfortable for running, or you can swivel them to fight fish. The swivel locks in place, and the seats can be slid fore and aft. They come with arm rests, rod holder, and gimbal.

FISHING/SKIING

Designed especially for the bass fisherman, the **Forward Pedestal Seat** has a back that lies down and snaps into place to increase operator visibility and protect upholstery from weather. Locking handle stops swivel action. Seat and pedestal can be removed from bulkhead-mounted pedestal base.

Similar in design to the Forward Pedestal Seat, the **Aft Pedestal Seat** is available with or without a **Stern Deck Assembly**. With the Stern Deck Assembly, the **Aft Pedestal Seat Assembly**, which includes base and support ring, may be converted for skiing by ordering the Ski Pylon without base and support ring.

CANVAS

The Newport **Flying Top Set**, including **Forward Shelter** and **Windshield** allows you to button up against the weather. When you're running, the Shelter doesn't interfere with the view from the helm. When not in use, Top, Shelter and Windshield can be zipped into their **Protective Boots**.

The **Weather Curtain Set**, including Drop Curtain and Starboard and Port Curtains, keeps things dry in the forward part of the cockpit. For even more cockpit protection, add a **Shelter Aft Curtain**.

A **Custom Mooring/Trailing Cover** protects your Newport from the elements when you're not aboard. Mildew and rot resistant blue acrylic won't shrink.

When you don't want to put up your full set of canvas, a **Reversible Pilot Seat Cover** or **Swivel Seat Cover** is an effective way to protect the seat from the elements.

A **Ski Pylon Assembly** gets the tow rope forward of the engine for better control. Pylon is heavy-duty stainless steel, including base and support ring.

With a **Stern Deck Cushion** the Newport stern deck becomes a lounging or sunbathing platform.

Show your pride in your Boston Whaler with 10½-inch-high red **Whaler Lettering**, port and starboard.

A 400 gallon per hour **Automatic Bilge Pump** includes a 3-position switch (off-automatic-manual) and an indicator light.

NEWPORT 17 OPTIONS

Seating

- Bow Platform Cushion
- Cushioned Cooler Seat—86 qt.
- Cushioned Cooler Seat—48 qt.

Sport Options.

Designed to let you work hard or play hard at just about anything that can be done on the water, the Sports, Super Sports, and Super Sport Limiteds have a wide range of options to meet every need.

SEATING

Sport.

Super Sport 15.

Sport and Super Sport **Comfort Cushion Sets** provide soft-riding comfort. They are closed-cell foam, which means they won't absorb water and become soggy. And they are covered with tough, traditional Boston Whaler upholstery. The Bow Platform Cushion is also covered with durable Boston Whaler upholstery for good looks and long life. A Bow Rail is required on Sports.

COCKPIT/HULL/FISHING

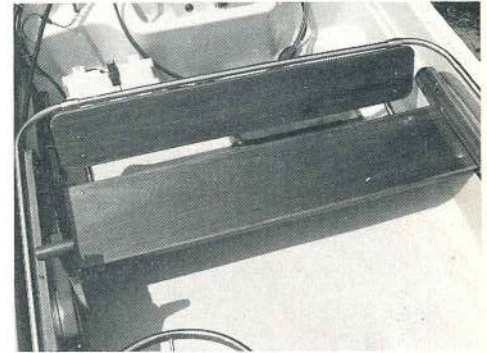

Sport 15.

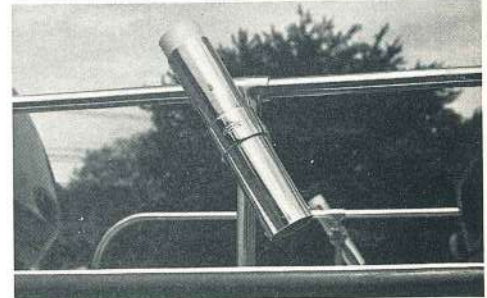

Available on all Sport models, the **Stainless Bow Rail** is highly recommended if you plan to have passengers sitting forward when the boat is running. Also available on Sports are **Stainless Side Rails**, which provide maximum handholds along the gunwales. A Bow/Side Rail is standard on Super Sports and Super Sport Limiteds.

Show off your pride in your Boston Whaler with port and starboard 10½-inch-high red **Whaler Lettering**. Available on 17 Super Sport and 17 Super Sport Limited only.

Our 400 gallon per hour **Automatic Bilge Pump** includes a 3-position switch (off-automatic-manual) and an indicator light.

Combining security with good looks is the stainless **Wrap Around Stern Rail** with mahogany backrest. It is available as a factory-installed option on the Sport 13 and 15.

Rail Mount Rod Holders are versatile, without requiring permanent fasteners. Universal mount allows you to vary rod angles. Stainless for beauty and long life. Not available on 11-foot models.

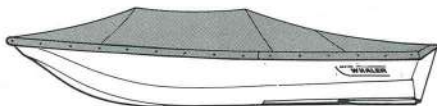

Super Sport Limited 15.

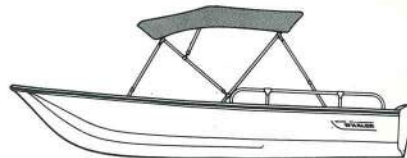

17

Super Sport 17.

A **Custom Mooring/Trailing Cover** protects your Super Sport from the elements when you're going to be away from it for long periods of time. Durable blue acrylic won't shrink with time. On Sports, specify with or without bow rails.

The **Sun Top** protects a large area of the cockpit from the sun, and zips into a **Protective Boot** when not in use. Not available on Sport 11.

SPORT, SUPER SPORT, AND SUPER SPORT LIMITED OPTIONS

Seating

- Comfort Cushion Set (cushioned seats are standard on Limited) includes:
 - Aft Seat Cushion
 - Forward Seat Cushion
 - Aft Backrest Cushion (available on 13 & 15 Sport when equipped with wrap-around rail with mahogany back rest, but part of Comfort Set only on Super Sports; requires Wraparound Rail)
 - Backrest Cushion, forward of console (only on Super Sports)
- Bow Platform Cushion (requires bow rail on Sports, bow/side rail on Super Sports)
- Forward Pedestal Seat – Sport 15

Cockpit/Hull/Fishing

- Compass – Ritchie Explorer
- Stainless Bow Rail (only on Sports)
- Stainless Side Rails (Sport 11, 13, 15)
- Stainless Steel Wrap-Around Rail with mahogany backrest (factory install; 13 and 15 Sports)
- Automatic Bilge Pump
- Workboat/Bassboat Specifications (factory install; n/a on 11)
- Rail Mount Rod Holders (13 to 17-foot models)
- Fire Extinguisher (17 Super Sport & 17 Limited only)
- Whaler 10½ inch lettering (17 Super Sport & 17 Limited only)
- Pony Motor Bracket (only on 15-foot models)
- Battery Box (standard on 15 & 17-foot models)

- Bow Chock (requires Bow Light; standard on 15 & 17-foot models)
- Fuel Tank Mats
- Oarlock Sockets; molded in, pair (Sports only)
- Oarlock Horns, pair (Sports only)
- Navigation Lights (standard on 15 & 17-foot models)

Canvas

- Custom Mooring/Trailing Cover (specify with or without bow rail on Sports)

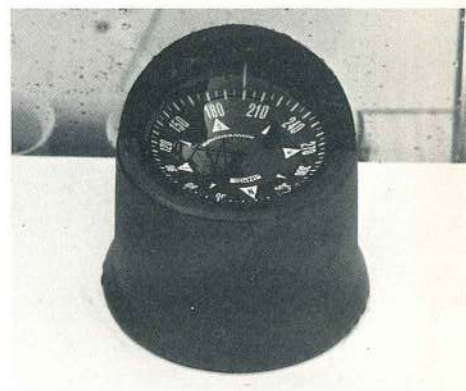

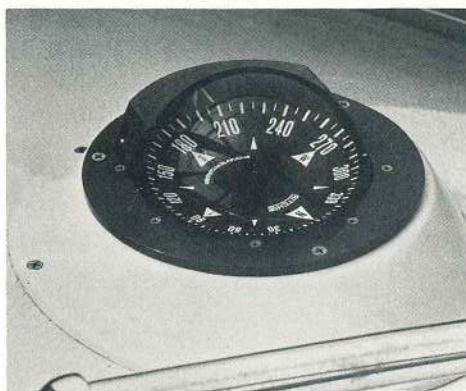

Steering and Controls (17 Super Sport)

- Morse Single Level Control, OMC or Merc
- Morse Control w/tilt & trim, OMC or Merc

For a complete description of options not shown, turn to pages 25-26.

Other Great Boston Whaler Options.

COCKPIT/CABIN/HULL

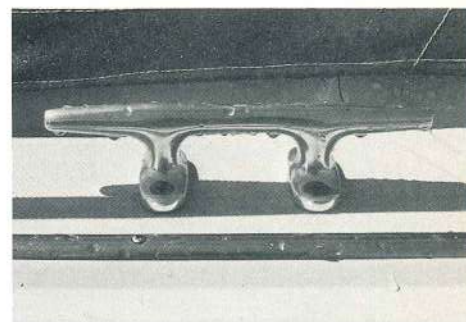

We offer three models of the famous **Ritchie Compass**: The Explorer, left, in a high-impact case, and the Navigator Surface Mount, or Binnacle Mount, both with built-in compensators, an easy-to-view lubberline, and a red light for night viewing.

Our 1500 gallon per hour **Bilge Pump**, standard on Outrage Cuddys and Revenges includes a 3-position switch (off-automatic-manual) and an indicator light.

The **Commercial Duty Rub Rail** kit is designed to stand up to rough workboat treatment. Of a heavier construction than Boston Whaler's already tough standard rub rail. Factory installation only. Available on Outrages.

Springline Cleats are constructed of heavy-duty Marimum, which won't rust or corrode. They are a real plus for tying up to a dock or alongside of another boat. Available on all Outrages, Revenges, and Whaler 27's.

Our **Battery Box** is made extremely safe and durable by a tough plastic case and a super-strong tie-down strap.

Navigation Lights are essential if you plan to use your boat after dark. Available on Sport 11, Sport 13, and Super Sport 11.

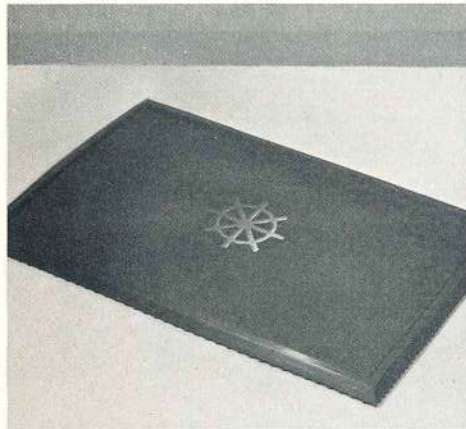

The **Stainless Bow Rail** is highly recommended if you plan to have passengers sitting forward when the boat is running. It is also designed to give anglers security when using the bow casting platform. Available on Sports and Stripers.

Workboat/Bassboat Specifications, recommended for commercial service and for the serious bass fisherman, is a factory-installed option that adds additional glass and resin to the hull.

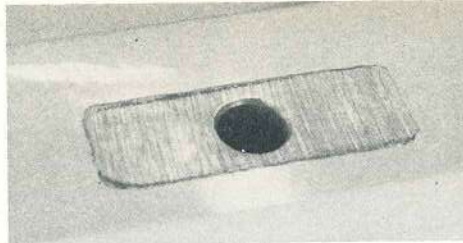

A versatile piece of hardware is the Boston Whaler **Bow Chock**. It is a custom chrome bronze casting that fits over the rub rail. Optional on 11- and 13-foot models. Bow light required.

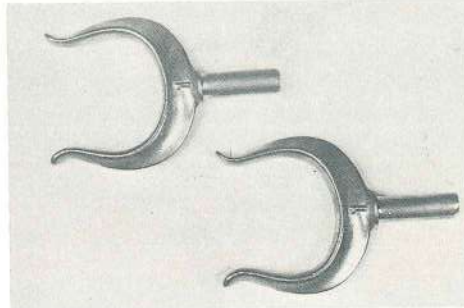

The **Fuel Tank Mat**, for 6-gallon or 12-gallon tanks, is made of tough rubber and is highly resistant to oil and gas. Serrated edges on the underside help prevent slippage.

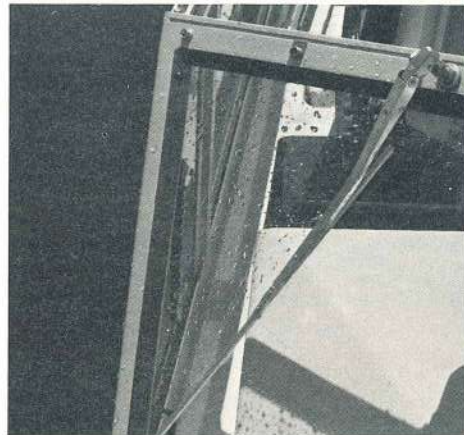

Electric Horn allows you to signal your intentions to bridge tenders and other boats. Available only on Whaler 27 Center Console Cuddy.

Molded-in **Oarlock Sockets** are a factory installed option that is set at the correct distance from seats for ease of rowing. Available on 13 and 15 Sport and 15 Striper. Standard on Tender 9 and 11 Sport.

Bronze **Oarlock Horns** have a custom tapered shank to fit molded-in Oarlock Sockets.

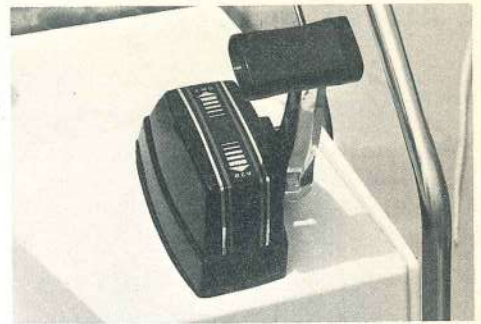

Windshield Wipers increase visibility, which contributes to greater safety. Available on 20', 22', 25' Walk-Throughs and 25' Walk-Around.

Extend your range with **Extra Fuel Capacity**. On all 22-foot models, the 119-gallon tank, with dual withdrawal fittings, replaces the standard 77-gallon fuel tank and eliminates the aft fishwell. On 27-foot models, you can add 43 extra gallons to inboards or 140 gallons to outboard or Sea Drives. Factory installed only.

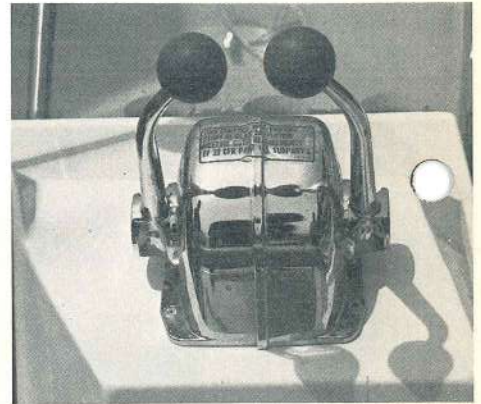

For added safety aft, **Stainless Stern Rail** fastens to gun'l. Available only on 20- and 22-foot models without stern seat.

STEERING AND CONTROLS

Morse Single Lever Binnacle Control incorporates throttle, shift, and Tilt and Trim into one unit for single-engine installations.

Morse Dual Engine Controls have throttle and shift for each engine in one handle. **Tilt and Trim** gauges with console mounted Tilt and Trim switches are also available. Specify OMC or Mercury.

Dual Engine Tie Bar is highly recommended to provide proper dual engine spacing for maximum performance. It is designed specifically for our suggested spacing and is constructed of solid stainless steel rod stock. Installation is with **Twin Cable Steering**.

For hydraulic installations a **Hydraulic Tie Bar** is available.
